

## Covid-19 European Travel and Containment Information Sheet

18.03.2020

**Attention:** The EU Commission has proposed a temporary restriction on non-essential external travel to the European Union for an initial 30 days – these measures are still subject to approval. Citizens, long term residents, family members of EU nationals, diplomats, healthcare workers, and transportation workers are exempt. These restrictions apply to all Schengen Area participant countries. Implementation depends on individual member countries. This policy applies to external EU borders only and internal EU border controls between member states are not affected. Some EU countries have implemented their own internal border restrictions.

**Disclaimer:** Falck Global Assistance adheres to the advice of local health authorities and the World Health Organization. Events regarding Covid-19 are subject to rapid change. Travelers are advised to follow the advice of their local health authorities.

**About:** The following is a brief overview of travel restrictions and containment measures for countries in Europe. This is a work in progress and efforts are being made to improve the collection and centralization of relevant inputs. Data collection was performed manually, and sources include national foreign ministries, embassies and consular missions abroad, and select newspapers of record.

**Note:** Keep in mind, information on this sheet is subject to rapid change. *This should be referenced as a starting point only.* **Travelers and their stakeholders are strongly encouraged to perform regular due diligence on travel destinations and transit routes before embarking on international travel as containment measures and travel restrictions change by the hour.**

Country	Travel Restrictions and Containment Measures	Latest Developments
Armenia	Travelers with recent history in China, France, Germany, Iran, Italy, Japan, Spain and South Korea may be asked to self-quarantine upon arrival. Land border closures with Iran in effect and suspension of flights to Iran as well as suspended its visa waiver program for Iranian and Chinese citizens. Implemented enhanced screening procedures.
